My objective is to start a career as a Junior Python developer and grow to a team leader in 5 years

EDUCATION

Intelligent systems
Technical University of Košice

09/2021 - Present *Letná 1/9, 040 01 Košice, Slovakia*

WORK EXPERIENCE

System Administrator
Studio Kulago

05/2022 - 08/2022 *Minsk, Belarus*
Hair coloring studio

Telegram Bot | YCLIENTS REST API
- I created a Telegram Bot from scratch for online recording using data via YCLIENTS

Contact : Anastasia Kulago - @kulago.anastasia (Instagram)

SKILLS

Python C / C++ OOP SQL / NoSQL
Pandas Selenium Requests Async
REST API DRY KISS YAGNI
Work for the result Sociability Teamwork

PERSONAL PROJECTS

Python - Telegram bot (06/2022 - 07/2022)
- This bot can start Internet speed test, send weather broadcast, get Instagram user posts, search photos in Google Images, start timer

Python - Lunch menu (02/2022 - 04/2022)
- This task assignment is to create a solution that will help diners choose the best meal combination that the canteen offers that day

Python - Wordle (02/2022 - 04/2022)
- The object of the game is to guess a five-letter word for six attempts, with the game revealing after each attempt whether our tip contains the correct letters and whether they are in the right place
- Based on this feedback, we can eliminate possible solutions and thus work towards the hidden word

Python - Dissemination of messages (04/2022 - 05/2022)
- We will use our simulations to find answers to the following questions:
- 1. How do different reports spread in a given population?
- 2. How many people, on average, get the news with some surprise?
- 3. What degree of surprise does the report need to reach a certain proportion of all people interested in the topic of the report within the population?
